2. POST-CONSTRUCTION DEEP CLEANING – PROJECT EXECUTION PHASES

The Post-Construction Deep Cleaning exercise shall be carried out in structured phases to ensure proper execution, quality control and professional finishing.

PHASE ONE – SITE PREPARATION, MOBILISATION AND INITIAL CLEANING

This phase involves the mobilisation of cleaning personnel, industrial machinery, equipment and materials to the project site.

Activities include:

- Mobilisation of skilled cleaning personnel.
- Deployment of industrial cleaning machinery and equipment.
- Transportation of cleaning tools and materials.
- General sweeping and dust extraction.
- Removal of construction debris and accumulated dust.
- Initial washing of tiled and hard surfaces.
- Removal of loose cement, grout and construction residues.
- Initial cleaning of accessible walls, doors and windows.
- Initial cleaning of toilets, bathrooms and kitchens.
- General preparation of all areas for detailed cleaning.
